## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The indicated allowability of claim 14 is withdrawn in view of the newly discovered reference(s) to Ogasawara et al U.S. Patent Number 6,307,865. Rejections based on the newly cited reference(s) follow.
2. Claims 2-5 and 18 are allowed.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 14-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Ogasawara et al U.S. Patent Number 6,307,865.

Re Claims 14-17 refer to Fig. 2, S12 discriminates whether the receive signal is MODEM modulation signal or data signal; if signaling data, S13-S16 are applied (all processing operation needed... interfaces); if data, S17-S19 are applied without (interpreting its contents) applying S13-S16 (See col. 6, lines 26 +), also see fig. 1, wherein the two separate interfaces are of similar transmission structure and protocol, and opposite processing sequences for a particular incoming signal.
